

CeMM AR - Augmented Reality App (iOS / Android)

Vers. 2.0

Scan this QR code and download the free app **CeMM AR** from the Apple App-/iTunes (iOS) or the Google Play-Store (Android).

After installing the app, focus your camera on the front-image of this trigger-card to bring an interactive augmented reality 3D-scenario to life.

Magnification scales in molecular medicine, biology and genetics are a fundamental part of the daily scientific discourse.

With the freely available augmented reality-application CeMM AR you get a three dimensional insight into wondrous universes, that can't be perceived with the naked eye anymore.

The smallest and most basic building blocks of life can be explored chronologically and learned freely: **From the living being, to the cell, to the gene.**
